Model Clauses for Track Access Agreements: Provisional Conclusions

Dear Mr Beswick

The above have reached me and in particular I would offer the following specific comments for your consideration.

Section 4 Output Statements

From a rolling stock manufacturers' point of view it is absolutely essential that Railtrack delivers a statement of outputs relevant to each operator. For the manufacturer there is a requirement for such outputs to be route as well as operator based.

Section 7 Implementation of the Regulator's conclusions and development of a Network Code.

We are in agreement with the development of a Network Code.

Regards

Per Staehr
