Dear *Ms. Grenfell,*

Proposals to modify Network Rail Infrastructure Ltd's network and station licences

Thank you for the opportunity to comment on your proposals to modify Network Rail Infrastructure Ltd's network and station licences. We note that the prime purpose of this exercise is to ensure that the licences are clear, up-to-date and fit for purpose.

We have given particular attention to the proposed modifications to clauses that contain reference to RSSB or RSSB's activities, including railway group standards. We are satisfied that the proposed wording properly reflects the current situation and therefore we have no objection to these proposals.

Yours sincerely

Aidan Nelson
